PROJECT NAME	Developing a Flight delay prediction model

DEVELOPING A FLIGHT DELAY PREDICTION MODEL USING MACHINE LEARNING

MODEL BUILDING

Choose the metrics of the model

```python
In [19]:  pred = clf.predict(X_test)
```

```python
In [20]:  #Model Evaluation
          from sklearn.metrics import accuracy_score
          print(accuracy_score(y_test, pred))

          0.9154844551765772
```
